

Additive & Dye Systems

General Description

Chemtec manufactures complete additive and dye systems for petroleum and petrochemical applications worldwide. From initial product design through onsite startup/commissioning, Chemtec offers the industry's most complete package from start to finish.

All Chemtec skids are built to meet specific customer requirements. A modular design ensures the product can be easily packed and shipped to the customer's site via truck, rail, or cargo ship. Chemtec skids are also designed to minimize re-assembly and startup expense once the skids are delivered on site.

Most additive and dye skids are equipped with the following components:

- storage tank with level gauge
- steel containment pan
- pump/motor assembly with starter/breaker
- additive/dye injectors
- walkway/platform
- interconnecting piping, tubing, and electrical

High quality, competitive pricing, and quick delivery... Chemtec delivers it all.

Applications

IVD Additives

Red/Yellow Dye

Lubricity Additive

Anti-static Additive

Ethyl Mercaptan

Liquid Performance Catalysts

Cetane Improver
