Re: Letter of Appreciation

Dear Milton:

Please allow me to express my gratitude for the quality of services rendered by Chemtec Energy Services during the recent Shell IVD and TxLED projects at the Waskom and Center ExxonMobil Distribution Terminals.

My interactions with various Chemtec employees have all been productive and pleasant. Specifically, Jeb Williams and Brian Duncan have gone above and beyond in every category that I can think of in promoting the success of these projects. Whether it was delivery issues, cost discussions, scheduling, or even our site visit to the Chemtec Plant; Jeb and Brian truly made it easy for me to successfully complete these projects. Throughout the project, I never encountered an issue could not be overcome amicably and fairly. The attention to detail and personal touch displayed during the duration of these projects truly impressed me.

I deeply appreciate the level of quality and thoroughness that was evidenced in all of my interactions with Chemtec employees. My gratitude goes out to you, sir, for your guidance and influence over such an extraordinary group of people.

Sincerely,

A handwritten signature in black ink that reads "Matthew Bayne". The signature is written in a cursive style and is underlined with a single horizontal line.
